GENERAL NOTE

Since public land transactions are reported at many different stages of processing, statistics released by the various land management agencies or by the same agency in different years must be checked carefully for comparability. The following paragraph, detailing the stages at which the data in the Appendix were reported, has therefore been prepared to clarify apparent discrepancies in published figures and to facilitate the use of these tables in conjunction with reports from other agencies or with previous General Land Office reports.

Areas officially surveyed are reported as of the date of acceptance of the plat of survey by the Commissioner of the General Land Office, but surveys in the field are reported as of the date of completion in the field. Withdrawals, restorations, and classifications are reported as of the date of the Act of Congress, proclamation, or order (Executive, Departmental, or Public Land Order) which determines the status of the lands involved. Patents and certifications are reported as of the date of issuance, as are deeds, permits, leases, licenses, and timber sale contracts. Entries, filings, and original selections are reported at the end of the accounting process, that is, when the required moneys are covered into the Treasury. Exchanges and grants are reported as of the date of the patent or certification conveying the exchanged lands to non-Federal owners. Receipts are reported as of the date they are covered into the Treasury. Lands found suitable for classification are reported as of the date of action, as are "O. and C." timber sales and collections. "O. and C." income, however, is reported as of the date the money is covered into the Treasury.

^{a/} Prepared by the Bureau of the Census in collaboration with the General Land Office and with the financial assistance of the Work Projects Administration to supplement the Sixteenth Decennial Census. This is the first basic recomputation of land and water areas of the United States since 1880, and supersedes the areas of States and Territories reached by joint calculations made in the General Land Office, the Geological Survey, and the Bureau of the Census and first published in 1906. These new computations are based on a set of Coast and Geodetic Survey aeronautical charts on a scale of 1:500,000. Areas were computed by means of international geodetic tables, supplemented by planimeter measurement and by reference to the plats of survey executed by the General Land Office.

a/ An original entry or selection is one made in pursuance of an act of the Congress which prescribes the terms and conditions under which patent may be issued or other evidence of title granted. An original entry becomes a final entry upon compliance by the entryman with further requirements of the law, such as residence or additional payment, and upon the issuance of a final certificate. A final certificate shows that, in the absence of irregularity, the entryman is entitled to a patent and passes equitable title to the land to the entryman. Where upon final examination it is found that an entry or selection is in proper form and that the law has been complied with, a patent conveying legal title to the claimant is issued. In the case of certain State selections, the legal title is conveyed upon approval thereof by the Secretary of the Interior and upon certification by the Commissioner of the General Land Office.

^{a/} In addition, ten applications for timber on controverted "O. and C." lands were approved for an estimated 60,000 M board feet, covering 2,700 acres. The difference between sales approved and sales made is due to the lag between date of approval and date of completion of sales, and to failure to receive bids on all sales advertised.

^{b/} Conflict with exchange, fire control, recreational, or watershed commitments.

ACREAGE GRANTED TO STATES FOR RAILROAD PURPOSES - Concluded

- a/ Names in parentheses are the names of the original grantees and the others are the names of the present railroads as given by the Federal Coordinator of Railroads in Public Aids to Transportation, Vol. II, Government Printing Office, Washington, D. C., 1938. For statutory citations, more detailed information, and an extensive bibliography on railroad grants, see the volume cited.
- b/ This grant was adjusted April 24, 1893, and 302,181.16 acres were allotted to the company. The balance of the previously certified lands was ordered restored to entry under the forfeiture act of September 29, 1890 (26 Stat. 496; 43 USC sec. 904 et seq.).
- c/ In the adjustment of this grant the road was treated as an entirety and without reference to the State line. More land has been certified to Alabama and less to Mississippi than they would appear to be entitled to in proportion to the length of the road in the respective States.
- d/ Does not include 109,756.85 acres situated in the Des Moines River improvement grant (Act of August 8, 1846, 9 Stat. 77) deducted pursuant to the decision in Walcott vs. Des Moines Co. (5 Wall. 631).
- e/ Does not include 35,685.49 acres deducted pursuant to decision cited in footnote d/.
- f/ Act of July 12, 1862 (12 Stat. 543) permitted the State to apply part of the river improvement grant of August 8, 1846 (9 Stat. 77) to railroad construction. For the original grant, see Table 82.
- g/ Does not include 77,535.32 acres deducted pursuant to the decision cited in footnote d/.
- h/ Does not include 186,936.72 acres in the Osage ceded Indian reservation deducted pursuant to the decision in Leavenworth, Lawrence, and Galveston R. R. vs. The United States (92 U.S. 733).
- i/ Does not include 270,970.78 acres deducted pursuant to the decision cited in footnote h/.
- j/ Certified lands aggregating 719,189.79 acres were reconveyed to the United States by the Governor of Louisiana February 24, 1888, the grant having been forfeited by the Act of July 14, 1870 (16 Stat. 277).
- k/ Excess of 131,481.71 acres originally certified was reconveyed by the State or entered under the act of March 3, 1887 (24 Stat. 556) by Michigan Land and Iron Co., Ltd., grant having been forfeited in part by the act of March 2, 1899 (25 Stat. 1008).
- l/ The grants made under the acts of March 3, 1857 (11 Stat. 195), March 3, 1865 (13 Stat. 526), and March 3, 1871 (16 Stat. 588) resulting in the construction of the St. Paul, Minneapolis and Manitoba (formerly first division and Vincent extension of St. Paul and Pacific) and St. Paul and Northern Pacific (formerly Western Railroad) were declared to be one grant (32 L.D. 21). The act of August 5, 1892 (27 Stat. 390) permitted the St. Paul, Minneapolis and Manitoba (now Great Northern, main and branch) to select indemnity lands in Minnesota, North Dakota, Montana, and Washington, the selections not to exceed 65,000 acres in the aggregate. See Minnesota for the original grants.
- m/ The grants which were to be used to aid in the construction of the La Crosse and Milwaukee and the Madison and Portage were conveyed by the State of Wisconsin to the Wisconsin Railroad Farm Portage Land Company for the benefit of farmers who had given the La Crosse and Milwaukee negotiable notes secured by mortgages on their farms in payment for railroad stock.
